**ICBM COMPLEX, SVOBODNYY, USSR
LAUNCH AREA G**

25X1D This report, based on KEYHOLE photography through [REDACTED] updates information on Launch Area G(7)*, Svobodnyy ICBM Complex, contained in NPIC/R-229/64, dated April 1964. Launch Area G (51-38N 127-58E), located 10 nm southwest of the complex support facility, consists of a completed Type IIIA launch site and a site support facility (Figure 1). The launch area was first identified in a midstage of construction in [REDACTED] and can be negated on photography of [REDACTED]. Construction of the launch area was considered complete in [REDACTED]

The launch site contains a loop road enclosing 3 launch silos, an earth-mounded control bunker on the north side of the silos, 2 possible semiburied tanks, and an earth-mounded possible structure adjacent to the easternmost silo. Short access roads connect the silos with the loop road. A probable spray

*TDI site designator is indicated in parentheses.

pond is north of the loop road. Two earth-mounded missile RIM buildings and 4 smaller buildings are southwest of the loop road. The [REDACTED]

[REDACTED]
very small structure is located 1,800 feet east and southeast, respectively, of the launch site and a small earth-mounded building is adjacent to the site access road. No security fencing is identifiable around the launch site, although ground scarring indicates the possibility of a double fence.

The site support facility is 2,500 feet north of the launch site. It consists of an administration and housing section which contains 38 buildings, including 9 barracks-type buildings. Four other buildings are northwest of the site support facility, adjacent to the complex main road. At least 14 buildings have been removed from the site support facility since [REDACTED]
